CONTENTS OF VOLUME 56

January **Number 1**

S. ISRAELSSON: The effects of wind and evaporation on space charge formation at the ground 1

S. V. SOLOMONOV, E. P. KROPOTKINA, A. N. LUKIN, N. I. PONOMARENKO, S. B. ROZANOV and J. ELLDER: Some features of the vertical ozone distribution from millimeter wave measurements at Pushchino and Onsala observatories 9

D. J. MURPHY, W. K. HOCKING and D. C. FRITTS: An assessment of the effect of gravity waves on the width of radar Doppler spectra 17

I. A. LYSENKO, YU. I. PORTNYAGIN, A. N. FAKHRUTDINOVA, R. A. ISHMURATOV, A. H. MANSON and C. E. MEEK: Wind regime at 80–110 km at mid-latitudes of the northern hemisphere 31

D. PANCHEVA, L. F. ALBERCA and B. A. DE LA MORENA: Simultaneous observation of the quasi-two-day variations in the lower and upper ionosphere over Europe 43

V. V. SOMAYAJULU, K. S. VISWANATHAN, K. S. V. SUBBARAO and L. CHERIAN: Distortions in the height structure of the equatorial electrojet during counter electrojet events 51

K. S. V. SUBBARAO and B. V. KRISHNA MURTHY: Post-sunset *F*-region vertical velocity variations at magnetic equator 59

N. BALAN, G. J. BAILEY, R. BALACHANDRAN NAIR and J. E. TITHERIDGE: Night-time enhancements in ionospheric electron content in the northern and southern hemispheres 67

H. LÜHR, H. GEISLER and K. SCHLEGEL: Current density models of the eastward electrojet derived from ground-based magnetic field and radar measurements 81

B. Z. KHUDUKON, E. D. TERESHCHENKO, A. V. GALINOV, A. A. POPOV and T. NYGRÉN: Determination of drift velocity and anisotropy of irregularities in the auroral ionosphere using radio source scintillation 93

N. RUELLE and T. LANDEAU: Interpretation of elevation-scan HF backscatter data from Losquet Island radar 103

O. V. FRIDMAN and S. V. FRIDMAN: A method of determining horizontal structure of the ionosphere from backscatter ionograms 115

L. M. ERUKHIMOV and L. M. KAGAN: Thermomagnetic effects in ionospheric plasma 133

V. I. BADIN: Quasi-equilibrium theory of the midlatitude protonosphere 141

Book reviews 147

February **Number 2**

GEOPHYSICAL PHENOMENA IN THE POLAR CAP DURING NORTHWARD INTERPLANETARY MAGNETIC FIELD

O. A. TROSHICHEV and W. J. BURKE: Introduction 151

N. V. ERKAEV, A. V. MEZENTSEV, V. V. DENISENKO, S. S. ZAMAY and O. A. TROSHICHEV: Electric field generation at the magnetospheric boundary for northward IMF 153

M. S. GUSSENHOVEN and D. H. BRAUTIGAM: Boundary populations in the polar caps 167

T. W. HILL: Theoretical models of polar-cap convection under the influence of a northward interplanetary magnetic field 185

J. J. MOSES and P. H. REIFF: Empirical convection models for northward IMF 195

W. J. BURKE, E. M. BASINSKA, N. C. MAYNARD, W. B. HANSON, J. A. SLAVIN and J. D. WINNINGHAM: Polar cap potential distributions during periods of positive IMF B_Y and B_Z 209

D. J. KNIPP, B. A. EMERY, A. D. RICHMOND and M. R. HAIRSTON: Mapping ionospheric convection response to IMF B_y negative and B_z positive conditions 223

O. A. TROSHICHEV and M. G. GUSEV: IMF B_x and B_y dependencies of the polar cap auroral distribution for northward IMF orientation inferred from observations at Vostok station 237

Y. KAMIDE and O. A. TROSHICHEV: A unified view on convection and field-aligned current patterns in the polar cap 245

J. S. MURPHREE, J. B. AUSTIN, D. J. HEARN, L. L. COGGER, R. D. ELPHINSTONE and J. WOCH: Satellite observations of polar arcs 265

R. J. NICIEJEWSKI, T. L. KILLEEN and Y. WON: Observations of neutral winds in the polar cap during northward IMF 285

D. REES, S. QUEGAN, R. J. MOFFETT, G. J. BAILEY and T. J. FULLER-ROWELL: Simulations of the behaviour of the polar thermosphere and ionosphere for northward IMF 297

March **Number 3**

ELECTRODYNAMICS OF THE MIDDLE ATMOSPHERE

M. J. RYCROFT: Preface 319

A. M. ZADOROZHNY, A. A. TYUTIN, O. A. BRAGIN and V. N. KIKHTENKO: Recent measurements of middle atmospheric electric fields and related parameters 321

V. YU TRAKHTENGERTS: The generation of electric fields by aerosol particle flow in the middle atmosphere 337

M. J. RYCROFT: Some effects in the middle atmosphere due to lightning 343

P. I. VELLINOV and P. T. TONEV: Penetration of multipole thundercloud electric fields into the ionosphere 349

REGULAR PAPERS

M. KLEIN and R. FURRER: UVB radiation changes in Berlin between 1967 and 1990 following alterations in the ozone layering 363

O. V. FRIDMAN, V. E. NOSOV and O. N. BOITMAN: Reconstruction of horizontally-inhomogeneous ionospheric structure from oblique-incidence backscatter experiments 369

R. I. BARNES: Full wave determination of oblique incidence reflection coefficients for model E_s-layers 377

L. A. HAJKOWICZ: Types of ionospheric scintillations in southern mid-latitudes during the last sunspot maximum 391

W. A. BRISTOW and B. J. WATKINS: Effect of the large-scale convection electric field structure on the formation of thin ionization layers at high latitudes 401

DAI KAILIANG and MA JIANMING: Comparison of total electron content calculated using the IRI with observations in China 417

V. ORAEVSKY, V. CHMYREV, I. SHIBAEV, V. DOKOUKIN, YA. SOBOLEV, D. SHKLYAR, B. LUNDIN, A. SADOVNIKOV, A. TISCHENKO, P. TŘÍSKA, F. JIŘÍČEK, J. VOJTA, F. HRUŠKA and D. TEODOSIEV: Effects of artificially injected electron beams on the characteristics of ground VLF transmitter signals in the ionosphere 423

J. VERÖ and J. CZ. MILETITS: Impulsive pulsation events and pulsation beats 433

March **Number 4**

Review Paper
M. GADSDEN and M. J. TAYLOR: Anweisungen für die photographischen aufnahmen der leuchtenden nachtwolken—103 years on 447

M. GADSDEN and M. J. TAYLOR: Measurements of noctilucent cloud heights: a bench mark for changes in the mesosphere 461

L. THOMAS and I. ASTIN: The form of metre-scale turbulence at mesopause heights in summer 467

V. I. FOMICHEV and G. M. SHVED: On the closeness of the middle atmosphere to the state of radiative equilibrium: an estimation of net dynamical heating 479

H. R. CARLON and J. LATHAM: Accelerated drying of water-wetted materials in electric fields 487

K. P. S. C. JAYARATNE and V. COORAY: The lightning HF radiation at 3 MHz during leader and return stroke processes 493

F. SIGERNES, D. A. LORENTZEN, C. S. DEEHR and K. HENRIKSEN: Calculation of auroral Balmer volume emission height profiles in the upper atmosphere 503

C. F. DEL POZO: Polarization electric field and Farley–Buneman instability during a precipitation event 509

A. R. JACOBSON and R. C. CARLOS: Observations of acoustic-gravity waves in the thermosphere following Space Shuttle ascents 525

B. V. KRISHNA MURTHY and K. S. V. SUBBARAO: Night-time equatorial F-region zonal plasma drifts from VHF backscatter radar observations 529

Book reviews 535

April Number 5

SOLAR TERRESTRIAL ENERGY PROGRAM (STEP)

I. Reid and P. Dyson: Preface 543

R. J. Stening: An investigation of solar activity effects in Australian radiosonde data ... 545

T. Tsuda, Y. Murayama, T. Nakamura, R. A. Vincent, A. H. Manson, C. E. Meek and R. L. Wilson: Variations of the gravity wave characteristics with height, season and latitude revealed by comparative observations 555

T. J. Harris: A long-term study of the quasi-two-day wave in the middle atmosphere ... 569

D. Lesicar, W. K. Hocking and R. A. Vincent: Comparative studies of scatterers observed by MF radars in the southern hemisphere mesosphere 581

R. A. Vincent: Gravity-wave motions in the mesosphere and lower thermosphere observed at Mawson, Antarctica 593

P. A. Greet and F. Jacka: Analysis of high-resolution mesospheric sodium twilight spectral emission profiles 603

M. A. de Deuge, P. A. Greet and F. Jacka: Optical observations of gravity waves in the auroral zone 617

J. A. Bennett, J. Chen and P. L. Dyson: Analytic calculation of the ordinary (O) and extraordinary (X) mode nose frequencies on oblique ionograms 631

T. D. Raymund, S. J. Franke and K. C. Yeh: Ionospheric tomography: its limitations and reconstruction methods 637

H. M. Beggs, E. A. Essex and D. Rasch: Antarctic polar cap total electron content observations from Casey Station 659

I. S. Dunlop, F. W. Menk, H. J. Hansen, B. J. Fraser and R. J. Morris: A multistation study of long period geomagnetic pulsations at cusp and boundary layer latitudes 667

D. Y. Zhang and K. D. Cole: Some aspects of ULF electromagnetic wave relations in a stratified ionosphere by the method of boundary value problem 681

May Number 6

SIR EDWARD APPLETON CENTENARY ISSUE

M. J. Rycroft: Preface 691

P. S. Excell: Sir Edward Appleton and Joseph Priestley: two giants of electrical science 693

H. J. Strangeways: Appleton's magneto-ionic theory and the Lorentz Polarisation Term 705

H. Rishbeth: What became of Appleton's ionosphere? 713

W. R. Piggott: Some reminiscences of work with Sir Edward Appleton 727

REGULAR PAPERS

Review paper
S. S. Sazhin and M. Hayakawa: Periodic and quasiperiodic VLF emissions 735

K. Sato: A statistical study of the structure, saturation and sources of inertio-gravity waves in the lower stratosphere observed with the MU radar 755

J. HANUMATH SASTRI and H. N. RANGANATH RAO: Optical interferometer measurements of thermospheric temperature at Kavalur (12.5°N, 78.5°E), India 775

J. K. HARGREAVES, T. J. ROSENBERG and D. L. DETRICK: Dynamics of auroral precipitation in the morning sector observed with the imaging riometer at South Pole station: evidence of co-rotating precipitation regions 783

May **Number 7**

CELEBRATION OF THE EIGHTIETH BIRTHDAY OF SIR GRANVILLE BEYNON

M. J. RYCROFT: Preface 795

L. THOMAS: Radio, rocket, and radar recollections 803

G. M. BROWN: Some radio reflections 807

P. J. S. WILLIAMS: Movements in the ionosphere 815

J. O. THOMAS: Some recollections of my early days in research 819

T. B. JONES: Last out—First in 827

B. H. BRIGGS: The spaced-receiver technique 831

G. L. GOODWIN: Ionospheric wind measurements and activities in Swansea 835

Y. BOGITCH and W. E. GORDON: Sir Granville Beynon and URSI 841

W. DIEMINGER: Sir Granville Beynon 845

K. RAWER: International cooperation in ionospheric research—before and after the International Geophysical Year 847

T. HAGFORS: Sir Granville Beynon and EISCAT 851

A. P. MITRA: Sir Granville Beynon and international science 855

A. H. SHAPLEY: W. J. G. Beynon—A paradigm of international cooperation in science 859

S. RUTTENBERG and H. RISHBETH: World data centres—past, present and future 865

D. M. WILLIS, A. HEWISH, H. RISHBETH and M. J. RYCROFT: Synoptic data for solar-terrestrial physics: the U.K. contribution to long-term monitoring 871

June **Number 8**

Review paper
N. V. SMIRNOVA and A. D. DANILOV: Rocket data on the *D*-region positive ion composition 887

J. LAŠTOVIČKA, V. FIŠER and D. PANCHEVA: Long-term trends in planetary wave activity (2–15 days) at 80–100 km inferred from radio wave absorption..... 893

P. O. CANZIANI: On tidal variability and the existence of planetary wave-like oscillations in the upper thermosphere—I. Observations of tidal variability 901

P. O. CANZIANI: On tidal variability and the existence of planetary wave-like oscillations in the upper thermosphere—II. Non-linear interactions and global scale oscillations..... 913

A. K. NEKRASOV: Nonlinear saturation of atmospheric gravity waves 931

N. J. MITCHELL, L. THOMAS and I. T. PRICHARD: Gravity waves in the stratosphere and troposphere observed by lidar and MST radar 939

D. J. RASCH and E. ESSEX: Quasi-periodic scintillation events at southern auroral latitudes 949

J. W. WRIGHT and M. L. V. PITTEWAY: High-resolution vector velocity determinations from the dynasonde 961

S. SALOUS: Dispersion of chirp pulses by the ionosphere 979

J. A. BITTENCOURT and M. CHRYSSAFIDIS: On the IRI model predictions for the low-latitude ionosphere 995

E. G. BELOVA and YU. P. MALTSEV: Supplementary sources of geomagnetic depression during the geomagnetic storm of 8–9 February 1986 1011

Book reviews 1017

July **Number 9**

THE INTERNATIONAL SYMPOSIUM, MARCH 1992

S. FUKAO and S. KATO: Preface 1025

K. LABITZKE: Stratospheric temperature changes after the Pinatubo eruption 1027

G. A. KOKIN and E. V. LYSENKO: On temperature trends of the atmosphere from rocket and radiosonde data 1035

T. HIROOKA, J. YAMASHITA and K. KAWAHIRA: Long-term variations of stratospheric circulations: a comparison of mean fields in the 1980s with CIRA-1986 models 1041

J. W. KRZYŚCIN: Total ozone changes in the northern hemisphere mid-latitudinal belt (30–60°N) derived from Dobson spectrophotometer measurements, 1964–1988 1051

S. CHANDRA, R. D. MCPETERS, W. PLANET and R. M. NAGATANI: The 27 day solar UV response of stratospheric ozone: solar cycle 21 vs. solar cycle 22 1057

J. EGGER: Antarctic slope winds and the polar stratospheric vortex 1067

M. L. CHANIN, A. HAUCHECORNE, A. GARNIER and D. NEDELJKOVIC: Recent lidar developments to monitor stratosphere–troposphere exchange 1073

A. V. SHMAKOV and E. A. USTINOV: Determination of the mesospheric ozone using satellite limb-scan measurements of the infra-red atmospheric band emission of O_2 ($^1\Delta_g$) 1083

E. A. JADIN and D. V. BROMBERG: Modelling of ozone reduction by stratospheric aircraft 1091

A. N. GRUZDEV and I. I. MOKHOV: Characteristics of intra-annual variations of N_2O and CH_4 in the middle atmosphere 1095

K. S. ZALPURI, T. OGAWA and N. IWAGAMI: Rocket measurements of nitric oxide in the equatorial region 1099

D. K. CHAKRABARTY, M. LAL, G. BEIG, J. S. SIDHU and S. R. DAS: Balloon measurements of stratospheric ion conductivities over the tropics 1107

O. P. NAGPAL, S. K. DHAKA and S. K. SRIVASTAV: Wave characteristics in the troposphere and stratosphere over the Indian Tropics during the DYANA period 1117

K. KUMAR and A. R. JAIN: Latitudinal variations of 30–70 day period waves over the tropical Indian zone 1135

F. S. KUO and H. Y. LUE: Effect of the wave–shear interaction on gravity wave activity in the lower and middle atmosphere 1147

A. R. JAIN, Y. JAYA RAO, P. B. RAO, G. VISWANATHAN, S. H. DAMLE, P. BLAMURALIDHAR and A. KULAKARNI: Preliminary observations using ST mode of Indian MST Radar: detection of the signature of the tropopause 1157

Y. MURAOKA, S. FUKAO, T. SUGIYAMA, M. YAMAMOTO, T. NAKAMURA, T. TSUDA and S. KATO: Features of a mesospheric inertio-gravity wave observed with the MU radar 1163

J. RÖTTGER: Middle atmosphere and lower thermosphere processes at high latitudes studied with the EISCAT radars 1173

B. L. KASHCHEYEV and A. N. OLEYNIKOV: Dynamic regime of the mesopause–lower thermosphere at mid-latitudes of the northern hemisphere by radio meteor observations 1197

B. V. KALCHENKO and B. L. KASHCHEYEV: Features of atmospheric motion parameter variations at altitudes of 80–105 km in two latitudinal zones of the northern hemisphere 1209

A. D. DANILOV: Ion chemistry of the lower thermosphere 1213

K. IGARASHI, S. KAINUMA, I. NISHIMUTA, S. OKAMOTO, H. KUROIWA, T. TANAKA and T. OGAWA: Ionospheric and atmospheric disturbances around Japan caused by the eruption of Mount Pinatubo on 15 June 1991 1227

August **Number 10**

MESOSPHERE–LOWER THERMOSPHERE COUPLING STUDY

A. H. MANSON: Preface 1235

J. M. FORBES, A. H. MANSON, R. A. VINCENT, G. J. FRASER, F. VIAL, R. WAND, S. K. AVERY, R. R. CLARK, R. JOHNSON, R. ROPER, R. SCHMINDER, T. TSUDA and E. S. KAZIMIROVSKY: Semidiurnal tide in the 80–150 km region : an assimilative data analysis 1237

J. E. SALAH, R. R. CLARK, J. M. FORBES, A. H. MANSON, S. K. AVERY and R. SCHMINDER: Radar observations of the semidiurnal tide in the mesosphere and lower thermosphere at midlatitudes 1251

R. SCHMINDER and D. KÜRSCHNER: Permanent monitoring of the upper mesosphere and lower thermosphere wind fields (prevailing and semidiurnal tidal components) obtained from LF D1 measurements in 1991 at the Collm Geophysical Observatory 1263

D. PANCHEVA and PL. MUKHTAROV: Variability of mesospheric dynamics observed at Yambol (42.5°N, 26.6°E) by meteor radar 1271

R. R. CLARK, A. C. CURRENT, A. H. MANSON, C. E. MEEK, S. K. AVERY, S. E. PALO and T. ASO: Hemispheric properties of the two-day wave from mesosphere–lower-thermosphere radar observations 1279

R. RÜSTER: VHF radar observations of nonlinear interactions in the summer polar mesosphere 1289

W. SINGER, J. BREMER, P. HOFFMANN, A. H. MANSON, C. E. MEEK, R. SCHMINDER, D. KÜRSCHNER, YU. I. PORTNYAGIN, N. A. MAKAROV, H. G. MULLER, E. S. KAZIMIROVSKY and R. R. CLARK: Geomagnetic influences upon tides—winds from MLT radars 1301

S. P. NAMBOOTHIRI, C. E. MEEK and A. H. MANSON: Variations of mean winds and solar tides in the mesosphere and lower thermosphere over time scales ranging from 6 months to 11 yr: Saskatoon, 52°N, 107°W 1313

J. E. SALAH: Variability of winds and temperatures in the lower thermosphere 1327

M.-L. DUBOIN, J. E. SALAH and J. M. FORBES: Semidiurnal tides deduced from Saint-Santin observations during the LTCS-1 campaign 1339

P. J. S. WILLIAMS, T. S. VIRDI, G. O. L. JONES and A. HUUSKONEN: A comparison of three methods of measuring tidal oscillations in the lower thermosphere using EISCAT common programmes 1347

E. S. KAZIMIROVSKY, V. D. KOKOUROV, G. V. VERGASOVA, E. I. ZHOVTY and V. A. GAIDUKOV: The semidiurnal tides at the midlatitude lower thermosphere over East Siberia 1361

S. MIYAHARA and J. M. FORBES: Interactions between diurnal tides and gravity waves in the lower thermosphere 1365

M. D. YAMANAKA and S. FUKAO: A simple model of gravity-wave momentum and energy fluxes transferred through the middle atmosphere to the upper atmosphere 1375

T. J. FULLER-ROWELL: The impact of gravity waves on nitric oxide in the lower thermosphere 1387

K. L. CHAN, H. G. MAYR, J. G. MENGEL and I. HARRIS: A spectral approach for studying middle and upper atmospheric phenomena 1399

Book reviews 1421

September **Number 11**

Review paper
N. P. DANILKIN: Transionospheric radiosounding 1423

E. L. AFRAIMOVICH, N. P. MINKO and S. V. FRIDMAN: Spectral and dispersion characteristics of travelling ionospheric disturbances as deduced from transionospheric sounding data 1431

B. DJ. CHAKENOV: TID, electron density and ionospheric sounding 1447

A. V. KULIZHSKY, L. V. PANKOV, YU. A. SEMENEI and M. V. TININ: The structure of the field of high-angle rays in a randomly inhomogeneous ionosphere at frequencies close to the maximum usable frequency 1451

L. A. SHCHEPKIN and I. A. FREIZON: Influence of fluctuations in neutral gas density height distribution on *F*1-layer dynamics 1457

Y. SAHAI, J. AARONS, M. MENDILLO, J. BAUMGARDNER, J. A. BITTENCOURT and H. TAKAHASHI: OI 630 nm imaging observations of equatorial plasma depletions at 16°S dip latitude 1461

I. A. MOLOTKOV and YU. N. CHERKASHIN: Some nonlinear effects of wave beam propagation in the ionosphere 1477

A. VILJANEN and R. PIRJOLA: On the possibility of performing studies on the geoelectric field and ionospheric currents using induction in power systems 1483

A. P. NICKOLAENKO and I. G. KUDINTSEVA: A modified technique to locate the sources of ELF transient events 1493

K. H. YEARBY and A. J. SMITH: The polarisation of whistlers received on the ground near $L = 4$ 1499

R. L. DOWDEN, C. D. D. ADAMS, J. B. BRUNDELL and P. E. DOWDEN: Rapid onset, rapid decay (RORD), phase and amplitude perturbations of VLF subionospheric transmissions 1513

Book reviews 1529

October **Number 12**

Obituary: Basil Hugh Briggs (1923–1994) — An appreciation 1533

B. W. JONES and C. A. L. JONES: Shadow bands during the total solar eclipse of 11 July 1991 1535

S. ISRAELSSON, E. KNUDSEN and S. V. ANISIMOV: Vertical profiles of electrical conductivity in the lowermost part of the turbulent boundary layer over flat ground 1545

S. ISRAELSSON: Measurements of surface-air space charges carried by dry wind-driven dust 1551

B. H. SUBBARAYA, S. LAL, S. VENKATARAMANI, A. G. ISHOV, S. P. PEROV and T. M. MCELROY: Variability in the total atmospheric ozone over Thumba measured with a Brewer spectrophotometer 1557

M. N. SASI: A relationship between equatorial lower stratospheric QBO and El Niño ... 1563

A. S. MEDVEDEV and V. I. FOMICHEV: Net radiative heating and diagnostics of the diabatic circulation in the 15–110 km height layer 1571

V. I. FOMICHEV, R. O. MANUILOVA and I. YA. GRINKEVICH: On the role of the 9.6 μm O_3 band in the energetics of the mesosphere and lower thermosphere 1585

F. VIAL and J. M. FORBES: Monthly simulations of the lunar semi-diurnal tide 1591

LUO YI and PEI-REN CHEN: Evidence for the coincident long period oscillations in the Equatorial Ionization Anomaly with the zonal neutral wind in the mesosphere 1609

Y. Z. SU, G. J. BAILEY and N. BALAN: Night-time enhancements in TEC at equatorial anomaly latitudes 1619

J. F. LEMAIRE and R. W. SCHUNK: Plasmaspheric convection with non-closed streamlines 1629

Book reviews 1635

November/December **Numbers 13/14**

THE DYANA CAMPAIGN, JANUARY TO MARCH 1990

D. OFFERMANN: Preface 1637

D. OFFERMANN: The DYANA campaign: a survey 1639

I. V. BUGAEVA, A. I. BOUTKO, G. A. KOKIN, YU. P. KOSHELKOV, S. P. PEROV, D. A. TARASENKO, G. R. ZAKHAROV, G. F. TOULINOV, D. OFFERMANN, M. BITTNER, U. VON ZAHN, M. L. CHANIN, A. HAUCHECORNE, I. SOULE, B. H. SUBBARAYA, M. GIL-OJEDA, B. A. DE LA MORENA, F. J. SCHMIDLIN, K. I. OYAMA and H. KANZAWA: Basic features of large-scale processes in the middle atmosphere during DYANA 1659

M. BITTNER, D. OFFERMANN, I. V. BUGAEVA, G. A. KOKIN, J. P. KOSHELKOV, A. KRIVOLUTSKY, D. A. TARASENKO, M. GIL-OJEDA, A. HAUCHECORNE, F.-J. LÜBKEN, B. A. DE LA MORENA, A. MOURIER, H. NAKANE, K. I. OYAMA, F. J. SCHMIDLIN, I. SOULE, L. THOMAS and T. TSUDA: Long period/large scale oscillations of temperature during the DYANA campaign 1675

J. SCHEER, E. R. REISIN, J. P. ESPY, M. BITTNER, H.-H. GRAEF, D. OFFERMANN, P. P. AMMOSOV and V. M. IGNATYEV: Large-scale structures in hydroxyl rotational temperatures during DYANA 1701

W. SINGER, P. HOFFMANN, A. H. MANSON, C. E. MEEK, R. SCHMINDER, D. KÜRSCHNER, G. A. KOKIN, A. K. KNYAZEV, YU. I. PORTNYAGIN, N. A. MAKAROV, A. N. FAKHRUTDINOVA, V. V. SIDOROV, G. CEVOLANI, H. G. MULLER, E. S. KAZIMIROVSKY, V. A. GAIDUKOV, R. R. CLARK, R. P. CHEBOTAREV and Y. KARADJAEV: The wind regime of the mesosphere and lower thermosphere during the DYANA campaign—I. Prevailing winds 1717

YU. I. PORTNYAGIN, N. A. MAKAROV, R. P. CHEBOTAREV, A. M. NIKONOV, E. S. KAZIMIROVSKY, V. D. KOKOUROV, V. V. SIDOROV, A. N. FAKHRUTDINOVA, G. CEVOLANI, R. R. CLARK, D. KÜRSCHNER, R. SCHMINDER, A. H. MANSON, C. E. MEEK, H. G. MULLER, J. C. STODDART, W. SINGER and P. HOFFMANN: The wind regime of the mesosphere and lower thermosphere during the DYANA campaign—II. Semi-diurnal tide 1731

C. RAGHAVA REDDI, K. RAJEEV, S. MURALEEDHARAN NAIR, B. H. SUBBARAYA, G. V. RAMA, K. S. APPU, V. NARAYANAN, B. V. APPARAO, S. C. CHAKRAVARTY, O. P. NAGPAL, S. P. PEROV and G. A. KOKIN: DYANA campaign results on long-period atmospheric waves over Thumba and Balasore 1753

A. HAUCHECORNE, N. GONZALEZ, C. SOUPRAYEN, A. H. MANSON, C. E. MEEK, W. SINGER, A. N. FAKHRUTDINOVA, U.-P. HOPPE, J. BOŠKA, J. LAŠTOVIČKA, J. SCHEER, E. R. REISIN and H. GRAEF: Gravity-wave activity and its relation with prevailing winds during DYANA 1765

H.-U. WIDDEL, M. BITTNER and U.-P. HOPPE: Vertical velocities measured at Biscarrosse (44°N) and by EISCAT at Tromsø (69.6°N) during the DYANA campaign 1779

E. V. THRANE, T. A. BLIX, U.-P. HOPPE, F.-J. LÜBKEN, W. HILLERT, G. LEHMACHER and D. C. FRITTS: A study of small-scale waves and turbulence in the mesosphere using simultaneous *in situ* observations of neutral gas and plasma fluctuations 1797

F.-J. LÜBKEN, W. HILLERT, G. LEHMACHER, U. VON ZAHN, T. A. BLIX, E. V. THRANE, H.-U. WIDDEL, G. A. KOKIN and A. K. KNYAZEV: Morphology and sources of turbulence in the mesosphere during DYANA 1809

W. HILLERT, F.-J. LÜBKEN and G. LEHMACHER: TOTAL: a rocket-borne instrument for high resolution measurements of neutral air turbulence during DYANA 1835

T. A. BLIX, E. V. THRANE, S. KIRKWOOD and K. SCHLEGEL: Plasma instabilities in the lower *E*-region observed during the DYANA campaign 1853

J. C. ULWICK, A. J. RATKOWSKI and U. MAKHLOUF: Twilight rocket measurements of high-latitude atomic oxygen density during the DYANA campaign 1871

K. U. GROSSMANN, D. HOMANN and J. SCHULZ: Lower thermospheric infra-red emissions from minor species during high-latitude twilight—A. Experimental results 1885

A. J. RATKOWSKI, R. H. PICARD, J. R. WINICK, K. U. GROSSMANN, D. HOMANN, J. C. ULWICK and A. J. PABOOJIAN: Lower-thermospheric infra-red emissions from minor species during high-latitude twilight—B. Analysis of 15 μm emission and comparison with non-LTE models 1899

B. H. SUBBARAYA, A. JAYARAMAN, S. LAL, S. VENKATRAMANI, T. JOHN, K. S. ZALPURI, C. R. SREEDHARAN, S. K. SRIVASTAVA, S. P. PEROV, G. A. KOKIN, S. V. TISHIN, S. A. VYAZANKIN, O. V. SHTIRKOV, A. F. CHIZHOV, V. M. IGNATOV and V. N. UVAROV: Variability in the vertical distribution of ozone measured over Thumba during the 1990 DYANA campaign 1915

A. K. KNYAZEV, Z. TS. RAPOPORT, V. M. SINELNIKOV and M. FRIEDRICH: Rocket electron density profiles over Volgograd, Heiss Island and Esrange during the DYANA campaign 1923

H. RANTA, A. RANTA, P. STAUNING, Z. TS. RAPOPORT, V. M. SINELNIKOV, S. KIRKWOOD, J. LAŠTOVIČKA and A. K. KNYAZEV: Morphology of the *D*- and *E*-regions at high latitudes in the northern hemisphere during the DYANA campaign in 1990 1933

J. LAŠTOVIČKA, L. F. ALBERCA, E. A. BENEDIKTOV, J. BOŠKA, J. BREMER, G. ENTZIAN, V. FIŠER, J.-C. JODOGNE, A. K. KNYAZEV, F. MARCZ, B. A. DE LA MORENA, PL. MUKHTAROV, T. OGAWA, D. PANCHEVA, H. RANTA, Z. TS. RAPOPORT and XIONG NIANLU: Lower ionosphere at middle latitudes: its morphology and response to meteorological and solar–terrestrial activity during the DYANA campaign 1990 1947

D. PANCHEVA, A. ANUFRIEV and J. LAŠTOVIČKA: Planetary wave activity in the lower ionosphere during the DYANA campaign 1963

F.-J. LÜBKEN, W. HILLERT, G. LEHMACHER, U. VON ZAHN, M. BITTNER, D. OFFERMANN, F. J. SCHMIDLIN, A. HAUCHECORNE, M. MOURIER and P. CZECHOWSKY: Intercomparison of density and temperature profiles obtained by lidar, ionization gauges, falling spheres, datasondes and radiosondes during the DYANA campaign 1969

N. GONZALEZ, A. HAUCHECORNE, S. KIRKWOOD, F.-J. LÜBKEN, A. H. MANSON, A. MOURIER, F. J. SCHMIDLIN, R. SCHMINDER, D. KÜRSCHNER, W. SINGER and H.-U. WIDDEL: Intercomparisons of simultaneous remote and *in situ* wind measurements 1985
